and wherein selecting a portion of the ~~script~~ the HTML content navigates the user to a corresponding location in the media content.

Claim 14 (currently amended): A method ~~for providing enhanced media content~~ as recited in claim 1 wherein the HTML content is in the form of an HTML page that starts a movie and checks for related Internet sites.

Claim 15 (currently amended): A method ~~for providing enhanced media content~~ as recited in claim 1 wherein the HTML content includes a page that links to a website.

Claim 16 (currently amended): A method ~~for providing enhanced media content~~ as recited in claim 1 wherein the HTML content includes a plurality of HTML files for accommodating a plurality of platforms of client devices.

Claim 17 (Original): A method for enhancing multimedia content, comprising the steps of:

- providing a recording medium;
- recording multimedia content onto the recording medium;
- integrating HTML content with the multimedia content;
- accessing the multimedia content and the HTML content, and
- playing multimedia content and the HTML content having been accessed.

Claim 18 (Original): A method for enhancing multimedia content as recited in claim 17 further including the step of recording the HTML content onto the recording medium.

Claim 19 (Original): A method for enhancing multimedia content as recited in claim 17 wherein the multimedia content is DVD content accessed by DVD firmware on a client device, and where the HTML content is stored locally on the client device.
